RC-Hospitality® Achieves Oracle® Validated Integration with Oracle Hospitality OPERA

Victoria, BC, Canada – Reliable Controls®, a Gold level member of Oracle PartnerNetwork (OPN), today announced the achievement of Oracle Validated Integration of RC-Hospitality® 1.0 with Oracle Hospitality OPERA 5.5. RC-Hospitality is a simple, flexible, and sustainable guest-room integration solution. RC-Hospitality automatically assigns the HVAC/lighting occupancy setting for any room upon guest check-in, enabling the MACH-System™ to improve guest-room comfort and operational efficiency, while delivering analytics for the entire facility.

To achieve Oracle Validated Integration, Oracle partners are required to meet a stringent set of requirements that are based on the needs and priorities of the customers. The integration will instill confidence in customers, helping to reduce costs and provide an improved user experience.

"Achieving Oracle Validated Integration gives our customers confidence that the integration between RC-Hospitality® and Oracle Hospitality OPERA is functionally sound and performs as tested," said David Hicks, vice president, Worldwide ISV Cloud Business Development, Oracle. "For solutions deployed on-premises, in the cloud, or both, Oracle Validated Integration applies a rigorous technical review and test process that helps to reduce deployment risk and improves the user experience of the partner's integrated offering."

About Oracle Validated Integration

Oracle Validated Integration, available through the Oracle PartnerNetwork, gives customers confidence that the integration of a complementary partner software product with an Oracle "on-premises" Application has been validated and the products work together as designed. This can help customers reduce risk, improve system implementation cycles, and provide for smoother upgrades and simpler maintenance. Oracle Validated Integration applies a rigorous technical process to review partner integrations and partners who successfully complete the program are authorized to use the "Oracle Validated Integration" logo.

About Oracle PartnerNetwork

Oracle PartnerNetwork (OPN) Specialized is the latest version of Oracle's partner program that provides partners with tools to better develop, sell and implement Oracle solutions. OPN Specialized offers resources to train and support specialized knowledge of Oracle products and solutions and has evolved to recognize Oracle's growing product portfolio, partner base and business opportunity. Key to the latest enhancements to OPN is the ability for partners to differentiate through Specializations. Specializations are achieved through competency development, business results, expertise and proven success.
